## **Central Sterilization**

The ECRI Institute named flexible endoscope reprocessing as the No. 1 health technology hazard of 2016. The CDC issued a health advisory and the FDA issued a safety communication, both highlighting sterilization and disinfection as an urgent public health issue - one that affects every hospital, ambulatory surgery center, physician practice, laboratory and CSSD.

Are your sterile processing operations compliant and safe? We partner with your reprocessing and surgical staff to make sure you can answer 'yes'. Our Central Sterilization audit gives you peace of mind that your sterile processing practices comply with the latest focus on regulations and deliver the highest quality and safety in healthcare.

## Our Approach

For more than two decades, Novia has partnered with hospitals and healthcare systems to improve their efficiency, quality and financial health. Today we continue to work with hospitals and healthcare systems to transform their surgical operations as they face increasing pressure to reduce costs associated with this critical contributor to the bottom line.

A clinician oversees every client project, and every project team comprises a project director responsible for ongoing client communication as well as subject-matter experts with immense knowledge and healthcare consulting experience. We begin each project with an assessment phase to identify opportunities to improve costs and efficiencies. We then vet each opportunity with you and together we prioritize the opportunities and determine the project plan to achieve the results. Once agreed, we move into implementation phase.

## All along, we remain focused on our core tenets

- 1. We do good client work...every time
- 2. We assemble strong teams
- 3. We motivate our people for exceptional performance
- 4. We operate our business in a manner that ensures your future and ours

## **Client Benefits**

Decrease risk to patients and hospitals

Improve patient & staff safety

**Ensure regulatory** compliance
