

Supply Chain Operational Improvement

Supply chain leaders are challenged to deliver best-in-class services while managing ever-increasing product costs and complex service delivery models. Improving the quality and reliability of your supply chain services frees your clinicians to focus on patient care while ensuring your organization benefits from significant supply cost reductions and efficiency improvements.

Leveraging technology, data, and proven methodologies, we identify strategic and operational opportunities to improve your supply chain services. Through empowerment and the creation of a culture of accountability, we ensure your organization sustains those improvements over the long term.

Our Approach

For more than two decades, Novia has partnered with hospitals and healthcare systems to improve their efficiency, quality, and financial health. Today we continue to work with hospitals and healthcare systems to transform their non labor expense management as they face increasing pressure to reduce costs associated with this major cost center.

A clinician oversees every client project, and every project team comprises a project director responsible for ongoing client communication, as well as subject-matter experts with immense knowledge and healthcare consulting experience. We begin each project with an assessment phase to identify opportunities to improve costs and efficiencies. We then vet each opportunity with you and together, we prioritize the opportunities and determine the project plan to achieve the results. Once agreed, we move into implementation phase.

All along, we remain focused on our core tenets

1. We do good client work...every time
2. We assemble strong teams
3. We motivate our people for exceptional performance
4. We operate our business in a manner that ensures your future and ours

Client Benefits

Improved distribution logistics

Reduced supply costs

Scalability

Increased GPO Participation

Timely access to data analytics
